# Instructions to Download Overjet-Dentrix Bridge Extension for One-Click Radiograph Access

Save time by eliminating the need to search for patients on the daily patients page. Instead, access patient radiographs directly from your Practice Management System once you have installed the Overjet extension on your workstation.

The download typically takes 5 minutes to complete. It needs to be installed for each Windows login on a workstation. To see if it's been downloaded and installed by a colleague already, click the Desktop tray in the bottom right corner of your Windows screen and see if there is an Overjet Bridge icon. If it's not there, proceed with the instructions below.

### 1

#### Log into Overjet on your workstation and select Download Overjet Extension

			OVERJE	г
